Aim:

Write a program to append data to an existing file and **display** its contents.

- open a new file "DemoTextFile1.txt" in write mode
- · write the content onto the file
- close the file
- open a new same file in append mode
- write the content onto the file
- · close the file
- open the same file in read mode
- read the text from file and print them on the screen
- · close the file

Source Code:

appendDataToFile.c

```
#include <stdio.h>
void main()
{
   FILE *fp;
   char ch;
   fp = fopen("DemoTextFile1.txt", "w");
   printf("Enter the text with @ at end : ");
  while ((ch = getchar()) != '@')
      putc(ch, fp);
   }
   fclose(fp);
   fp = fopen("DemoTextFile1.txt", "a");
   printf("Enter the text to append to a file with @ at end : ");
   while ((ch = getchar()) != '@')
      putc(ch, fp);
   putc(ch, fp);
   fclose(fp);
   fp = fopen("DemoTextFile1.txt", "r");
   printf("File content after appending : ");
   while ((ch = getc(fp)) != '@')
   {
      putchar(ch);
   printf("\n");
   fclose(fp);
}
```

Execution Results - All test cases have succeeded!

Test Case - 1
User Output
Enter the text with @ at end : I am studying@

Test Case - 2
User Output
Enter the text with @ at end : CodeTantra
developed@
Enter the text to append to a file with @ at end : an interactive tool
to learn Programming@
File content after appending : CodeTantra
developed
